MUNAGANURI YASASWINI

Quality Analyst | QA Automation Engineer | API & AI/LLM Testing

+91 9652983720 | yasaswini827@gmail.com | LinkedIn | GitHub

Professional Summary

Quality Analyst and QA Automation Engineer with nearly 1 year of professional experience spanning manual testing, Selenium automation, REST API validation, SQL backend verification, mobile testing, and AI/LLM application testing. Experienced across CRM, ERP, enterprise client, and AI-driven applications; recognized with a 33% merit-based salary increase within 7 months for QA delivery, defect detection, and prompt-engineering contributions. Strong in Agile test execution, defect lifecycle management, and release validation.

Technical Skills

Automation: Selenium WebDriver, Java, TestNG, Maven, Page Object Model (POM), Data-Driven Testing, XPath, Git, GitHub

Testing: Functional, Regression, Smoke, Sanity, Exploratory, Cross-Browser, Mobile (iOS/Android), SDLC, STLC, Agile/Scrum

API & AI Testing: REST APIs, Postman, JSON, HTTP Status Codes, Payload/Header Validation, Prompt Engineering, LLM Testing

Database: SQL, MySQL, DML/DDL, SELECT/WHERE/JOIN, Data Integrity and UI-to-Database Validation

Professional Experience

Quality Analyst **Nov 2025 - Aug 2026**

Biztechnosys Infotech Private Limited Bangalore, India

- Earned a **33% merit-based salary increase within 7 months** for QA delivery, defect detection accuracy, and prompt-engineering contributions.
- Executed **250+ manual and API test cases per sprint** across CRM, ERP, enterprise client, and AI applications, contributing to a **30%+ reduction in post-release defects** through structured functional, regression, smoke, sanity, and exploratory testing.
- Automated critical regression workflows using **Selenium WebDriver, Java, TestNG, Maven, and POM**, improving repeatability and regression coverage.
- Validated REST APIs for the internal AI Bot with **Postman**, covering HTTP methods, 2xx/4xx/5xx responses, headers, JSON payloads, assertions, and negative scenarios.
- Converted **BRDs and Agile user stories into traceable test cases**, then logged, retested, and verified defects through release closure with developers.
- Performed **SQL backend validation** using SELECT, WHERE, and JOIN queries to reconcile UI transactions with stored data and verify data integrity.
- Validated AI-driven behavior through prompt/response testing, conversation-flow checks, payload verification, and response-latency checks.

Selected Application Experience

CRM Application – Web & Mobile *Biztechnosys Infotech*

- Executed end-to-end functional, regression, smoke, sanity, and exploratory testing across customer management, lead tracking, sales pipelines, and real-time interaction workflows.
- Authored and executed **100+ structured test cases**, covering positive, negative, boundary, validation, and business-rule scenarios; logged defects, performed retesting, and verified fixes through release closure.
- Performed cross-browser and **Android/iOS mobile testing** to validate responsive layouts, navigation, touch interactions, data consistency, and behavior across varying screen sizes and devices.

ERP Application – Enterprise System *Biztechnosys Infotech*

- Conducted end-to-end functional and regression testing across resource allocation, project tracking, employee management, and related enterprise workflows.
- Validated complex business rules, field-level validations, workflow dependencies, and **role-based access controls** across different user roles and permissions.
- Performed integration validation between modules and verified backend data consistency using SQL queries, helping identify critical defects before client acceptance and production release.

Honda Enterprise Web Application *Biztechnosys Infotech*

- Performed end-to-end manual testing of core business workflows for an enterprise web application, validating functional requirements against expected user journeys and acceptance criteria.
- Executed release-readiness, sanity, regression, and exploratory testing under tight delivery timelines, prioritizing high-risk workflows and verifying critical fixes before deployment.
- Collaborated with developers and project stakeholders during defect triage, reproducing issues with detailed test evidence and validating resolved defects against expected behavior.

Corporate Portal & AI Chatbot *Biztechnosys Infotech*

- Validated corporate portal functionality across key navigation, content, forms, and user workflows, identifying functional and usability issues before release.
- Performed **REST API testing using Postman** for the integrated AI chatbot, validating request methods, HTTP status codes, headers, JSON payload structures, and response schemas.
- Tested AI chatbot conversation flows using prompt-based scenarios, including response consistency, payload validation, response latency, and edge-case inputs to support reliable AI-assisted interactions.

Certification

Prompt Engineering Fundamentals – Anthropic 2026

Education

Bachelor of Technology (B.Tech) **Graduated 2025**

Kallam Haranadhareddy Institute of Technology, Guntur, Andhra Pradesh CGPA: **8.46/10.0**
